

2020 年 12 月 8 日 (星期二) 09:10-11:30

会议论文口头报告

地点：线上

09:10-09:25	报告人：于鯤 题 目：A Pulmonary Artery-Vein Separation algorithm based on the relationship between sub-trees	主持人：张 意 曹 鹏
09:25-09:40	报告人：张彬 题 目：An Auto-Encoding Generative Adversarial Networks For Generating Brain Network	
09:40-09:45	报告人：武博 题 目：Deeply Supervised U-Net with Feature Fusion: Automatic COVID-19 Lung Infection Segmentation from CT Images	
09:45-10:00	报告人：王仲华 题 目：Deep Learning Based Discrimination of Corneal Ulcer Patterns Using Fluorescein Staining Images	
10:00-10:15	报告人：黄义劲 题 目：Automated Diabetic Retinopathy Identification via Lesion Guided Network	
10:15-10:30	报告人：张悦 题 目：Coarse-to-fine Kidney Segmentation Incorporating Abnormality Detection and Correction	
10:30-10:45	报告人：陶泽阳 题 目：Identifying Hierarchical Individual Functional Network under Naturalistic Paradigm via Two-stage DBN with Neural Architecture Search	
10:45-11:00	报告人：李子涵 题 目：A New Microorganism Dataset for Image Segmentation and Classification Evaluation	
11:00-11:15	报告人：李阳 题 目：Multi-energy CT image restoration algorithm based on the flat-panel X-ray source	
11:15-11:30	报告人：李立圆 题 目：Impaired Capacity to Process Cross-modal Emotional Information between Facial and Auditory Channels in Major Depression Disorders
